INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter I of the Patent Cooperation Treaty)

(PCT Rule 44bis)

Applicant's or agent's file reference 38.80062/001	FOR FURTHER ACTION	See item 4 below
International application No. PCT/GB2004/001156	International filing date (day/month/year) 18 March 2004 (18.03.2004)	Priority date (day/month/year) 18 March 2003 (18.03.2003)]
International Patent Classification (IPC A61F 2/06	C) or national classification and IPC	
Applicant VERYAN MEDICAL LIMITED		

	-	
1.	This international preliminary re International Searching Authori	eport on patentability (Chapter I) is issued by the International Bureau on behalf of the ty under Rule 44 bis. 1(a).
2.	This REPORT consists of a total	of 7 sheets, including this cover sheet.
		ence to the written opinion of the International Searching Authority should be read as a reference report on patentability (Chapter I) instead.
3.	This report contains indications	relating to the following items:
	Box No. I	Basis of the report
	Box No. II	Priority
	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
	Box No. IV	Lack of unity of invention
	Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
	Box No. VI	Certain documents cited
	Box No. VII	Certain defects in the international application
	Box No. VIII	Certain observations on the international application
4.		ommunicate this report to designated Offices in accordance with Rules 44bis.3(c) and 93bis.1 but makes an express request under Article 23(2), before the expiration of 30 months from the priority
		Date of issuance of this report 23 September 2005 (23 09 2005)

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/GB2004/001156

	Box No	. 1 Basis of the opinion
1.	the lang	gard to the language , this opinion has been established on the basis of the international application in juage in which it was field, unless otherwise indicated under this item.
	lan (ur	s opinion has been established on the basis of a translation from the original language into the following guage , which is the language of a translation furnished for the purposes of international search der Rules 12.3 and 23.1(b)).
2.	With re necess	gard to any nucleotide and/or amino acid sequence disclosed in the international application and ary to the claimed invention, this opinion has been established on the basis of:
	a. type	of material:
		a sequence listing
		table(s) related to the sequence listing
	b. form	aat of material:
		in written format
		in computer readable form
	c. time	of filing/furnishing:
		contained in the international application as filed.
		filed together with the international application in computer readable form.
		furnished subsequently to this Authority for the purposes of search.
;	h C	n addition, in the case that more than one version or copy of a sequence listing and/or table relating them as been filed or furnished, the required statements that the information in the subsequent or additional opies is identical to that in the application as filed or does not go beyond the application as filed, as ppropriate, were furnished.
	4. Additi	onal comments:

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following documents:

D1: WO00/38591 D2: EP1269935 D3: WO00/48530

- Independent claims 1, 4, 14, 17, 20, 22, and 25 do not fulfill the requirements of Article 33(2) PCT because their subject-matter is not novel.
- a. Document D1 discloses a graft comprising flow tubing having a tubing portion defining a flow lumen (abstract), the flow lumen of said tubing portion being substantially free of ribs or grooves (p. 9, l. 4, 5: tube 11 may have internal ridging or grooving, but not necessarily), wherein the centre line of the flow lumen follows a substantially helical path (p. 9, l. 4, 5: twist; Fig. 3) with a helix angle less than or equal to 65° (p. 3, l. 14, 15), and wherein the amplitude of the helix is less than or equal to one half of the internal diameter of the tubing portion (Fig. 3). Thus, claim 1 is not novel.
- b. The same document D1 discloses also the additional subject-matter of claim 4, i.e. the wall having a helical portion so as to resist reduction of the amplitude of the helical centre line (p. 4, l. 8, 9: the thread imparting helical formation constitutes a helical portion).
- c. The same document discloses or at least suggests the production methods of claims 14, 17, 20, 22, and 25 (p. 4, l. 5-17).
- d. Note that also docuement D2 anticipates the subject-matter of claims 1 and 4 and of dependent claims 5-12 (cf. international search report and references cited therein).
- 2. The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 3 does not involve an inventive step in the sense of

Article 33(3) PCT. The subject-matter of claim 3 differs from claim 1 in that the amplitude of the helical centre line is more than or equal to 0.05 of the internal diameter of the tubing portion. Although this parameter is not disclosed in D1 it can be directly derived from Fig. 3 without any inventive activity.

3. Dependent claims 2, 5-13, 15, 16, 18, 19, 21, 23, 24, 26, and 27 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty or inventive step, see documents D1, D2, and D3 and the corresponding passages cited in the search report.

Re Item VII

Certain defects in the international application

- 1. Independent claim 1 is not in the two-part form in accordance with Rule 6.3(b) PCT, which in the present case would be appropriate, with those features known in combination from the prior art (document D1) being placed in the preamble (Rule 6.3(b)(i) PCT) and with the remaining features being included in the characterising part (Rule 6.3(b)(ii) PCT).
- 2. The features of the claims are not provided with reference signs placed in parentheses (Rule 6.2(b) PCT).
- Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the documents D1 is not mentioned in the description, nor is this document identified therein.

Re Item VIII

Certain observations on the international application

1. Although claims 1, 3, and 4 on one hand and claims 14, 17, 20, 22, and 25 on the other hand have been drafted as separate independent claims, they appear to relate effectively to the same subject-matter and to differ from each other only with regard to the definition of the subject-matter for which protection is sought and in respect of the terminology used for the features of that subject-matter. The aforementioned claims therefore lack conciseness. Moreover, lack of clarity of the claims as a whole arises, since the plurality of independent claims makes it

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

PCT/GB04/01156

difficult, if not impossible, to determine the matter for which protection is sought, and places an undue burden on others seeking to establish the extent of the protection.

Hence, claims 1, 3, 4, 14, 17, 20, 22, and 25 do not meet the requirements of Article 6 PCT.

2. The present application does not fulfill the requirements of Article 6 PCT because the expression "flow lumen ... free of ribs or grooves" in claims 1 and 4 is not clear. So the helical portion 6 of Fig. 4 does define a rib in the flow lumen. If one considers the envelope 5 of the tube as nominal diameter of the tube then the helical portion 6 constricts this diameter locally, thereby creating a protrusion in the flow lumen, which consitutes a "rib" in the broadest sense of this term.
